How to disable the Pop-up only for eProtocol in Microsoft Internet Explorer

There are two methods:
Method 1:

For the first time as you login eProtocol, you will find the warning message shown as “Pop-up blocked. To see this pop-up or additional options click here...”. Click the message line and then select “Always Allow Pop-ups from This Site...”. Click the “Yes” button to allow pop-ups from website of Academia Sinica. Finally, click "Cancel" and then Re-start the browser. The setting is permanent and valid all the time unless the computer has been re-installed.
Method 2:

Before login to eProtocol, find the “**Pop-up Blocker Setting**” of “**Pop-up Blocker**” from “**Tools**”.
Key in “*.sinica.edu.tw” at the address allowed box, then click “**Add**”. Finally, click “**Close**” and it’s done. The setting is permanent and valid all the time unless the computer has been re-installed.
For Mac users: please disable the "Block pop-up windows" from Security.
